

Weller® University

Train your team with our experienced specialists.

Take advantage of our extensive soldering expertise built up over the last 50 years and use it to optimise your soldering processes.
Train your team with Weller's experienced specialists.

Weller® soldering seminars according to ICP standard

Our soldering seminars, single or multi day, are led by a certified IPC 7711/610D trainer. As well as covering general soldering challenges we are also able to help you find the best solutions to your individual soldering applications. In addition to providing general training content we will always ensure that the specific requirements of every training group, maximum 10 persons, is recognised and satisfied.

A review and evaluation is carried out of all training sessions. Each attendee at a training session will, in addition to the extensive training, receive a certificate to recognise that they have completed the training. Seminars and training sessions can be held either on your own company premises or in Weller's dedicated training and application facility within their manufacturing plant in Besigheim.

- In compliance with IPC 7711 / 610D
- Team size 5 to 10
- Training at company facility or Weller training centre in Besigheim

Product Training Content

- Application training on all Weller soldering products
- Reworkseminars for repair of electronic modules and boards
- Training on solder fume extraction
