

New compact filter for Weller fume extraction unit WFE 2S

Eco-friendly new design

The new compact filter for the WFE2S is an eco-friendly green design. The new construction is of a robust carton box, built onto a sturdy plastic frame but still uses the tried and tested combination of a grade F7 pre-filter, grade H 13 fine particle HEPA filter and a wide band gas filter of 50% active carbon and 50% puratex.

Rigorous process control in the assembly of the filter ensures the effective removal of fumes to maintain safe and pleasant working environment.

The choice of materials enhances the ecological credentials of the filter. At 3.1 kg it is 50% lighter than the previous design. Reducing transport costs. It is easily recycled and replacement costs are reduced.

The current version of the filter part no. T0053535883 is still available as a replacement while stock lasts. The current pre-filters grade F5 part no. T0058735884 and grade F7 part no. T0058735885 cannot be used with the new filter.

Order No. for new compact filter:

- T005 87 359 36 Kompaktfiter HEPA H13 + Gasfiter, WFE 2S
- T005 87 359 38 Feinstaubfiter F7 WFE 2S (10) 270 x 270

We wish you and your family
merry Christmas
and a happy new year!

Your Weller Team
