Christian and Jochen Metz in the local Blumberg

We are continuing where history left off and will still rely on optimal connections in the future!

Dear business partners,
dear customers,

The family-owned company METZ CONNECT has stood for precision, reliability and ingenuity for more than four decades. Virtues that we put into practice every day at all of our worldwide production and distribution sites.

As pioneers in the communication between people and equipment, it goes without saying that we also pass on our experience and knowledge across generations. And grow steadily in the process!

The METZ CONNECT range is divided into three core areas and offers a wide range of solutions for the most demanding needs:

- | | |
|---------------------|---|
| P Cabling | Copper and glass fiber components as well as automated infrastructure management for structured network cabling |
| U>Contact | PCB connection technology for the connection of devices and controls in building and industrial automation |
| C Logline | Intelligent system and switch cabinet components for building and process automation. |

You will encounter products from METZ CONNECT several times a day, often without seeing them: whether PCB components or connection terminals in control elements, copper and fiber optic components for network cabling or intelligent I/O components in the control cabinet for building automation. Many areas of everyday life, including complex industrial supply and production chains, require the intelligent networking of the involved devices and components. For all these application situations, METZ CONNECT offers full service, from the printed circuit board to the Internet.

As a partner of numerous international companies, we offer expertise resulting from 40 years of experience in standardised and, above all, customer-specific system solutions for a variety of applications in connection technology. We see ourselves as a problem solver and do not settle for the second-best solution. The search for perfection may seem expensive, but it is worth it.

Join us in mutual projects concerning equipment and plant construction as well as the structured cabling of buildings and industrial sites. We are looking forward to working with you!

Best regards

Jochen Metz
Managing Partner

Christian Metz
Managing Partner

and the entire team from METZ CONNECT.

Innovation and consistency – from the printed circuit board to the end device.

Our high-quality, user-friendly and internationally standardised components and systems are divided into three clear ranges:

P | Cabling

Copper and Fiber Optics solutions for networks

Highly specialised, internationally standardised and high-performance network solutions in copper and fiber optic technology are impressive due to their comfortable installation, maximum quality and highest system capability across all relevant performance classes. They are used in structured building and industrial cabling as well as in data centres.

Connectors

Wall outlets,
distributors

patch cables,
lines

The increasing demand for data transmission volumes requires the ever greater performance and consistency of the data networks. IT technologies can be found in many applications in buildings, data centres and industrial plants.

U | Contact

Connection systems for printed circuit boards

Innovative products, solutions and systems for the connection technology of printed circuit boards and devices. Products that are compatible with market standards as well as customised product solutions, including for industrial control and building automation, reflect our core competence in this area.

Terminal blocks,
pin headers

Connectors

Board-to-board

C | Logline

Intelligent components for systems and switch cabinets

Intelligent system components for highly communicative and decentralised control in the areas of building and process control, relay technology and telecommunications

Bus modules

Interface modules

Timer-, process- and
monitoring relays

Uniform automation – central engineering

Building automation, Process engineering

C | Logline

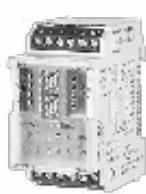

high performance components for integrated control tasks

Technical networks and safety solutions in buildings and industrial plants are becoming increasing more intelligent. They offer the possibility of integrating internal and external processes so they can be controlled and monitored efficiently. METZ CONNECT has the perfect solutions for this.

With the C|Logline product group, METZ CONNECT provides consistent, system-capable and intelligent network components for sustainable building automation, maximum protection, optimum process control and efficient energy controlling. Advantages: High performance components shorten assembly time, reduce energy consumption, create transparency or make it possible to resolve several tasks with just one device, for example.

Energy controlling

Simple energy consumption data acquisition

The market for energy management is currently growing rapidly. As a result of the trend towards digitisation and government support programmes, such as special equalisation schemes and peak balancing, more and more small and medium-sized enterprises (SMEs) in Germany are becoming involved in energy management. The solution approaches range from a simple visualization of the energy consumption to automation, and all the way up to a certified energy management system. The consistent

energy data collection is a prerequisite, in order to introduce an effective energy management in the company. The collection of all relevant energy data plays an important role for the improvement of energy consumption. The collection and analysis of the energy data can be submitted for the so-called peak balancing in accordance with § 55 Energy Tax Act and § 10 Electricity Tax Act. This allows companies to benefit from tax advantages and also save electricity tax.

Contents | Energy controlling

1	Data logger Multi I/O controller	14
2	Data logger Accessories	14
3	M-Bus Components Converter	15
4	M-Bus Components M-Bus distributor	15
5	M-Bus Components Software	15

Only three steps are necessary to take advantage of tax savings:

- Step 1:** Energy data acquisition - acquisition of energy flows and energy sources
- Step 2:** Analysis of the energy data and determination of important characteristic values
- Step 3:** Documentation of the energy consumed in the plants, machinery and equipment

The application for peak balancing must be submitted to an environmental verifier or an accredited certification body as proof of the introduction of an energy management system in accordance with DIN ISO 50001.

With the new EWIO₂-M data logger and a large number of expansion modules, METZ CONNECT offers the optimum solution for a simple energy consumption data acquisition, and makes it easier for companies to introduce energy management.

Data logger

Multi I/O controller

EWIO₂-M
(M-Bus)

Data logger with integrated data base and web server for energy consumption monitoring on M-Bus, SO and Modbus RTU.

- Function: Data logger
- Interfaces: M-Bus, Modbus RTU, SO and I/Os
- Protocol: LAN, TCP/IP

EWIO₂-M-BM
(M-Bus/BACnet/Modbus)

Modbus TCP or BACnet/IP data logger with integrated data base and web server for energy consumption monitoring on M-Bus, SO and Modbus RTU.

- Function: Data logger
- Interfaces: M-Bus, Modbus RTU, SO and I/Os
- Protocol: LAN, BACnet/IP, Modbus TCP

EWIO₂-MW
(M-Bus/WLAN)

Data logger with integrated data base, web server and WLAN interface for energy consumption monitoring on M-Bus, SO and Modbus RTU.

- Function: Data logger
- Interfaces: M-Bus, Modbus RTU, SO and I/Os
- Protocol: LAN, WLAN, TCP/IP

EWIO₂-MW-BM
(M-Bus/WLAN/BACnet/Modbus)

Modbus TCP or BACnet/IP data logger with integrated data base, web server and WLAN interface for energy consumption monitoring on M-Bus, SO and Modbus RTU.

- Function: Data logger
- Interfaces: M-Bus, Modbus RTU, SO and I/Os
- Protocol: LAN, WLAN, BACnet/IP, Modbus TCP

M-Bus components

Converter

S0/M converter 4 fold S0/M-F converter 4 fold

4 channel S0-pulse to M-Bus converter for the detection of S0-pulses according to DIN EN 62053-31 class A in housing for DIN rail mounting TH35.

- › Function: S0/M converter
- › Inputs: 4 x S0 according to DIN EN 62053-31 Class A
- › Protocol: M-Bus

S0/M converter double-rate

2 channel S0 pulse to M-Bus converter for the detection of S0 pulses according to DIN EN 62053-31 class A with two counting registers T1 and T2 for double tariff meters in housing for DIN rail mounting TH35.

- › Function: S0/M converter double-rate
- › Inputs: 2 x S0 and 1 x S0 with two counting register
- › Protocol: M-Bus

T/M converter T/M-F converter

4 channel temperature/resistance to M-Bus converter for the acquisition of passive temperature sensors, such as PT100, PT1000, NTC1k8, etc. in a housing for DIN rail mounting TH35.

- › Function: T/M converter
- › Inputs: 4 x temperature input
- › Protocol: M-Bus

MYD IP65

M-Bus distributor for structured M-Bus cabling, as well as maintenance and commissioning of M-Bus structures in IP65 housing for ceiling or wall mounting.

- › Function: distributor
- › Inputs: 1 x M-Bus, 1 x voltage
- › Outputs 6 x M-Bus, 2 x voltage

I/O components

I/O components with BACnet/IP, Modbus TCP, BACnet MS/TP-, Modbus RTU, M-Bus, LON®- and CAN technologies

Automation of buildings, machines and systems

In order to safely and efficiently operate today not only large but also small buildings, it has become indispensable to automate the most important service functions such as monitoring, air conditioning and lighting systems. This, however, leads to rising demands in terms of building installation, which in general can no longer be met by conventional techniques.

This is the reason why building automation relies ever more on serial bus systems controlling the transmission of information between sensors and actuators, switches and higher control systems.

21	Accessories Power supplies.....	27

These bus systems offer different advantages:

- ease of planning and installing of building functions
- strong flexibility in the use of buildings since functions can be programmed freely and can thus be re-configured at any time.

Thanks to the availability of microcontrollers and to the reduction of the sizes and prices of the installed electronic components, automation has now also found its way into areas, which due to the implied costs were not suited for field bus solutions before. In particular in the linking of sensors, actuators and control units within machines and of devices used for measuring, control and monitoring systems, serial bus systems offer strong advantages.

Ethernet I/Os

Multi I/O controller

EWIO₂
(Ethernet-I/O)

Ethernet I/O controller with integrated web server for control tasks in building and industrial automation. It has digital and analog inputs and outputs.

- > Inputs: 40-4 Mohm, 0-10 V, 0-20 mA, contact
- > Outputs: 0-10 V, Relais, PNP, Triac
- > Interfaces: LAN, TCP/IP

EWIO₂-BM
(Ethernet-I/O/BACnet/Modbus)

BACnet/IP or Modbus TCP-I/O controller with integrated web server for control tasks in building and industrial automation. It has digital and analog inputs and outputs.

- > Inputs: 40-4 Mohm, 0-10 V, 0-20 mA, contact
- > Outputs: 0-10 V, Relais, PNP, Triac
- > Interfaces: LAN, BACnet/IP, Modbus TCP

EWIO₂-W
(Ethernet-I/O/WLAN)

Ethernet I/O controller with integrated web server for control tasks in building and industrial automation. It has WLAN as well as digital and analog inputs and outputs.

- > Inputs: 40-4 Mohm, 0-10 V, 0-20 mA, contact
- > Outputs: 0-10 V, Relais, PNP, Triac
- > Interfaces: LAN, WLAN, TCP/IP

EWIO₂-W-BM
(Ether.-I/O/WLAN/BACnet/Modb.)

BACnet/IP or Modbus TCP-I/O controller with integrated web server for control tasks in building and industrial automation. It has WLAN as well as digital and analog inputs and outputs.

- > Inputs: 40-4 Mohm, 0-10 V, 0-20 mA, contact
- > Outputs: 0-10 V, Relais, PNP, Triac
- > Interfaces: LAN, WLAN, BACnet/IP, Modbus TCP

Modbus RTU I/Os

Digital input

MR-DI4
MR-F-DI4

I/O module for DIN rail mounting TH35 with 4 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- > Inputs: 4 x Digital inputs
- > Outputs: -
- > Protocol: Modbus RTU, RS485

MR-DI4-IP65

I/O module in IP65 surface mount housing with 4 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- > Inputs: 4 x Digital inputs
- > Outputs: -
- > Protocol: Modbus RTU, RS485

MR-DI4-IP65

Modbus RTU I/Os

Digital input

MR-SI4
MR-F-SI4

I/O module for DIN rail mounting TH35 with 4 SO inputs according to DIN EN 62053-31 class A for counting SO counter pulses, e.g. in energy controlling systems etc.

- > Inputs: 4 x Digital inputs
- > Outputs: -
- > Protocol: Modbus RTU, RS485

Analog input

MR-AI8
MR-F-AI8

I/O module for DIN rail mounting TH35 with 8 configurable resistance range or voltage inputs for the detection of e.g. passive and active temperature sensors, etc.

- > Inputs: 8 x Analog inputs
- > Outputs: -
- > Protocol: Modbus RTU, RS485

MR-CI4
MR-F-CI4

I/O module for DIN rail mounting TH35 with 4 analog voltage or current inputs for the detection of e.g. electrical ventilation and mixing flaps, etc.

- > Inputs: 4 x Analog inputs
- > Outputs: -
- > Protocol: Modbus RTU, RS485

MR-SM3
MR-F-SM3

I/O module for DIN rail mounting TH35 with 3 analog inputs for monitoring three 230 Volt power circuits e.g. variables such as voltage, current, power, asymmetry, etc.

- > Inputs: 3 x Analog inputs
- > Outputs: -
- > Protocol: Modbus RTU, RS485

Modbus RTU I/Os

Digital output

MR-DO4
MR-F-DO4

I/O module for DIN rail mounting with 4 relay outputs and manual operation for the control of e.g. lamps, blinds, contactors, motors, etc.

- > Inputs: -
- > Outputs: 4 x Digital outputs
- > Protocol: Modbus RTU, RS485

MR-DOA4
MR-F-DOA4

I/O module for DIN rail mounting TH35 with 4 relay outputs for the control of e.g. lamps, blinds, contactors, motors, etc.

- > Inputs: -
- > Outputs: 4 x Digital outputs
- > Protocol: Modbus RTU, RS485

MR-TO4
MR-F-TO4

I/O module for DIN rail mounting TH35 with 4 Triac outputs and manual operation for the control of e.g. PWM actuators, HVAC valves, contactors, etc.

- > Inputs: -
- > Outputs: 4 x Digital outputs
- > Protocol: Modbus RTU, RS485

MR-AOP4
MR-F-AOP4

I/O module for DIN rail mounting TH35 with 4 voltage outputs and manual operation for the control of e.g. ventilation and mixing flaps, valve positions, etc.

- > Inputs: -
- > Outputs: 4 x Analog outputs
- > Protocol: Modbus RTU, RS485

I/O module for DIN rail mounting TH35 with 4 analog voltage outputs for the control of e.g. ventilation and mixing flaps, valve positions, etc.

- > Inputs: -
- > Outputs: 4 x Analog outputs
- > Protocol: Modbus RTU, RS485

Mixed modules

MR-Multi-I/O

Multi-I/O for DIN rail mounting TH35 with 29 digital and analog inputs/outputs for connecting sensors and actuators to a Modbus controller.

- > Inputs: 12 x digital, 7 x analog
- > Outputs: 8 x digital, 2 x analog
- > Protocol: Modbus RTU, RS485

MR-AIO4/2-IP65

I/O module in IP65 housing with 4 configurable resistance range or voltage inputs and 2 analog outputs e.g. for temperature detection and control of mixing flaps,etc.

- > Inputs: 4 x Analog inputs
- > Outputs: 2 x Analog outputs
- > Protocol: Modbus RTU, RS485

MR-DIO4/2
MR-F-DIO4/2

I/O module for DIN rail mounting TH35 with 4 digital inputs and 2 relay outputs for e.g. detection of window contacts and control of blinds, etc.

Modbus RTU I/Os

Mixed modules

MR-DIO4/2-IP65

I/O module in IP65 surface mount housing with 4 digital inputs and 2 relay outputs for e.g. detection of window contacts and control of blinds etc. Operating voltage 24 V AC/DC

- > Inputs: 4 x Digital inputs
- > Outputs: Digital outputs
- > Protocol: Modbus RTU, RS485

MR-DIO4/2-IP65 230 V

I/O module in IP65 surface mount housing with 4 digital inputs and 2 relay outputs for e.g. detection of window contacts and control of blinds etc. Operating voltage 230 V AC

- > Inputs: 4 x Digital inputs
- > Outputs: 2 x Digital outputs
- > Protocol: Modbus RTU, RS485

MR-TP
MR-F-TP

I/O three-point module for DIN rail mounting TH35 with 6 digital inputs and 2 two-stage relays and 2 digital outputs with manual operation for e.g. blind controls, etc.

- > Inputs: 6 x Digital inputs
- > Outputs: 4 x Digital outputs
- > Protocol: Modbus RTU, RS485

MR-LD6
MR-F-LD6

I/O module for DIN rail mounting TH35 with 6 analog inputs and 2 relay outputs for monitoring leaks and/or fill levels, as well as control of e.g. valves or signal transmitters etc.

- > Inputs: 6 x Analog inputs
- > Outputs: 2 x Digital outputs

Modbus RTU I/Os

Modbus Gateway

Modbus TCP Gateway

Modbus RTU/TCP Gateway with integrated web server for bi-directional data exchange between Modbus RTU field devices and a Modbus Master. For DIN rail mounting TH35.

- › Galvanic separation: 1.5 kV
- › Network connection: 1 x Ethernet-Port (RJ45)
- › Protocol: Modbus RTU, Modbus TCP

Accessories

Submersible Electrode TE2

Single-pole dipped electrode made of stainless steel for the detection of electrically conductive liquids, e.g. in water supply and pumping stations. For connection to the level-monitors ENW-E12 and MR-LD6.

- › Electrode material: Stainless steel
- › Housing: Polypropylene
- › Length: 115 mm

Leakage sensor LKS-ZD

LKS-ZD for leak monitors MR-LD6 and ENW-E12. In case of leakages such as pipe breaks, electrically conductive liquids are detected by the electrodes.

- › Material: Stainless steel
- › Housing: Polycarbonate with mounting opening
- › Application: ENW-E12, MR-LD6 (with wire break monitoring)

USB/RS485 converter

The USB/RS485 Converter is an adapter cable for connecting serial UART interfaces with USB. In combination with the MR-CT configuration software, the Modbus RTU devices can be configured with a PC.

- › Cable end 1: USB connector
- › Cable end 2: Free wires, tin-plated
- › Cable length: 1.8 m

Modbus TCP Gateway
P/N 11083001

Submersible Electrode TE2
P/N 11032401

Leakage sensor LKS-ZD
P/N 11032902

USB/RS485 converter
P/N 11080101

Modbus RTU I/Os

Software

Modbus configuration tool

Configuration and test program for the MC Modbus RTU MR-I /Os. The function includes the search for all devices, selected address areas, setting the transmission rate and parity, as well as reading and controlling the I/Os.

- › Function: configuration tool, Change transfer rate and Parity, control and reading of the I/Os

BACnet MS/TP I/Os

Digital input

BMT-DI4
BMT-F-DI4

I/O module for DIN rail mounting TH35 with 4 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- › Inputs: 4 x Digital inputs
- › Outputs: -
- › Protocol: BACnet MS/TP, RS485

BMT-DI4-IP65

I/O module in IP65 surface mount housing with 4 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- › Inputs: 4 x Digital inputs
- › Outputs: -
- › Protocol: BACnet MS/TP, RS485

BMT-DI10
BMT-F-DI10

I/O module for DIN rail mounting TH35 with 10 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- › Inputs: 10 x Digital inputs
- › Outputs: -
- › Protocol: BACnet MS/TP, RS485

BMT-SI4
BMT-F-SI4

I/O module for DIN rail mounting TH35 with 4 SO inputs according to DIN EN 62053-31 class A for counting SO counter pulses, e.g. in energy controlling systems etc.

- › Inputs: 4 x Digital inputs
- › Outputs: -
- › Protocol: BACnet MS/TP, RS485

BACnet MS/TP I/Os

Analog input

BMT-AI8
BMT-F-AI8

I/O module for DIN rail mounting TH35 with 8 configurable resistance range or voltage inputs for the detection of e.g. passive and active temperature sensors, etc.

- › Inputs: 8 x Analog inputs
- › Outputs: -
- › Protocol: BACnet MS/TP, RS485

BMT-CI4
BMT-F-CI4

I/O module for DIN rail mounting TH35 with 4 analog voltage or current inputs for the detection of e.g. electrical ventilation and mixing flaps, etc.

- › Inputs: 4 x Analog inputs
- › Outputs: -
- › Protocol: BACnet MS/TP, RS485

BMT-DO4
BMT-F-DO4

I/O module for DIN rail mounting TH35 with 4 relay outputs and manual operation for the control of e.g. lamps, blinds, contactors, motors, etc.

- › Inputs: -
- › Outputs: 4 x Digital outputs
- › Protocol: BACnet MS/TP, RS485

BMT-TO4
BMT-F-TO4

I/O module for DIN rail mounting TH35 with 4 Triac outputs and manual operation for the control of e.g. PWM actuators, HVAC valves, contactors, etc.

- › Inputs: -
- › Outputs: 4 x Digital outputs
- › Protocol: BACnet MS/TP, RS485

BACnet MS/TP I/Os

Analog output

BMT-AOP4
BMT-F-AOP4

I/O module for DIN rail mounting TH35 with 4 voltage outputs and manual operation for the control of e.g. ventilation and mixing flaps, valve positions, etc.

- › Inputs: -
- › Outputs: 4 x Analog outputs
- › Protocol: BACnet MS/TP, RS485

BMT-AO4
BMT-F-AO4

I/O module for DIN rail mounting TH35 with 4 analog voltage outputs for the control of e.g. ventilation and mixing flaps, valve positions, etc.

- › Inputs: -
- › Outputs: 4 x Analog outputs
- › Protocol: BACnet MS/TP, RS485

Mixed modules

BMT-Multi-I/O

Multi-I/O for DIN rail mounting TH35 with 29 digital and analog inputs/outputs for connecting sensors and actuators to a BACnet controller.

- › Inputs: 12 x digital, 7 x analog
- › Outputs: 8 x digital, 2 x analog
- › Protocol: BACnet MS/TP, RS485

BMT-DIO4/2
BMT-F-DIO4/2

I/O module for DIN rail mounting TH35 with 4 digital inputs and 2 relay outputs with manual operation for e.g. detection of window contacts and control of blinds, fire safety flaps, etc.

- › Inputs: 4 x Digital inputs
- › Outputs: 2 x Digital outputs
- › Protocol: BACnet MS/TP, RS485

I/O components

BACnet MS/TP I/Os

Mixed modules

BMT-DIO4/2-IP65

I/O module in IP65 surface mount housing with 4 digital inputs and 2 relay outputs for e.g. detection of window contacts and control of blinds, etc. Operating voltage 24 V AC/DC

- › Inputs: 4 x Digital inputs
- › Outputs: 2 x Digital outputs
- › Protocol: BACnet MS/TP, RS485

BMT-DIO4/2-IP 230 V

I/O three-point module for DIN rail mounting TH35 with 6 digital inputs and 2 two-stage relays and 2 digital outputs with manual operation for e.g. blind controls, etc. Operating voltage 230 V AC

- › Inputs: 4 x Digital inputs
- › Outputs: 2 x Digital outputs
- › Protocol: BACnet MS/TP, RS485

BMT-TP
BMT-F-TP

I/O three-point module for DIN rail mounting TH35 with 6 digital inputs and 2 two-stage relays and 2 digital outputs with manual operation for e.g. blind controls, etc.

- › Inputs: 6 x Digital inputs
- › Outputs: 4 x Digital outputs
- › Protocol: BACnet MS/TP, RS485

BACnet IP / BACnet MS/TP router

Router with integrated web server for independent routing between BACnet/IP and BACnet MS/TP networks. Allows the integrator, e.g. METZ CONNECT, to integrate BMT-I/O modules into an IP network.

- › Ethernet interface: RJ45, 10/100 Mbps
- › MS/TP communication: RS485
- › Protocol: BACnet MS/TP, BACnet/IP

LON FT I/Os

Digital input

LF-DI4
LF-F-DI4

I/O module for DIN rail mounting TH35 with 4 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

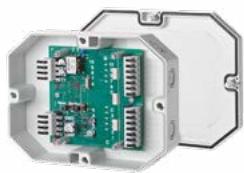

- › Inputs: 4 x Digital inputs
- › Outputs: -
- › Protocol: LON FT/TP-10

LF-DI10
LF-F-DI10

I/O module for DIN rail mounting TH35 with 10 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- › Inputs: 10 x Digital inputs
- › Outputs: -
- › Protocol: LON FT/TP-10

LF-DI10-IP65

I/O module in IP65 surface mount housing with 10 digital inputs for detection of potential-free switch states, e.g. electrical limit switches on ventilation flaps, etc.

- › Inputs: 10 x Digital inputs
- › Outputs: -
- › Protocol: LON FT/TP-10

LF-DI230
LF-F-DI230

I/O module for DIN rail mounting TH35 with 4 digital voltage inputs for detection of 230 V AC switch states, e.g. switches or buttons for light control, etc.

- › Inputs: 4 x Digital inputs
- › Outputs: -
- › Protocol: LON FT/TP-10

Mixed modules

LF-AM2/4

I/O module for DIN rail mounting TH35 with voltage inputs, 2 voltage and 2 PhotoMos outputs e.g. for the control of ventilation flaps and alarming at set threshold value, etc.

- › Inputs: 2 x Analog inputs
- › Outputs: 2 x Digital and 2 x analog outputs
- › Protocol: LON FT/TP-10

LF-TI-IP65

I/O module in IP65 surface mount housing with 4 resistance range/voltage inputs and 4 Triac outputs, e.g. for detection of temperatures or voltages and for switching thermal valve drives, etc.

- › Inputs: 4 x Analog inputs
- › Outputs: 4 x Digital outputs
- › Protocol: LON FT/TP-10

LF-DM4/4

I/O module for DIN rail mounting TH35 with 4 digital inputs, 2 relay and 2 PhotoMOS outputs e.g. for the detection of switch states and switching of ventilation and mixing flaps, etc.

- › Inputs: 4 x Digital inputs
- › Outputs: 4 x Digital outputs
- › Protocol: LON FT/TP-10

**LF-TP
LF-F-TP**

I/O three-point module for DIN rail mounting TH35 with 6 digital inputs and 2 two-stage relays and 2 PhotoMos outputs with manual operation for e.g. blind controls, etc.

I/O module for DIN rail mounting TH35 with 4 digital inputs and 2 relay outputs with manual operation for e.g. detection of window contacts and control of blinds, fire safety flaps, etc.

- Inputs: 4 x Digital inputs
- Outputs: 2 x Digital outputs
- Protocol: LON FT/TP-10

LF-DIO4/2-IP65

I/O module in IP65 surface mount housing with 4 digital inputs and 2 relay outputs with manual operation for e.g. detection of window contacts and control of blinds, fire safety flaps, etc.

- Inputs: 4 x Digital inputs
- Outputs: 2 x Digital outputs
- Protocol: LON FT/TP-10

Interface module

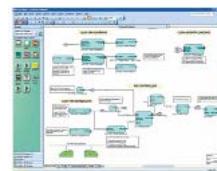

LF-FAM

Connection module for DIN rail mounting TH35 for bus connection, supply voltage and bus termination. Wiring aid for power supply and bus connection.

- Bus termination network topology: 52.3 Ohm (R/2)
- Bus termination line topology: 105 Ohm R
- Connection type: RJ45 and connection terminal block

Software

Echelon IzoT® CT 4.1 Standard

IzoT CT (Commissioning Tool) standard, max. number of networks limited to 5. (Echelon/Adesto Model-No.: 38100-401)

Echelon U10 USB Network Interface
P/N 110214

CAN I/Os

Digital input | Analog input

FDE 4

I/O module for DIN rail mounting TH35 with 4 digital inputs e.g. for detection of switch states of limit switches, etc. FDE 4 and FRAS 4/21 with the same address react autonomously in a network.

- > Inputs: 4 x Digital inputs
- > Outputs: -
- > Protocol: CAN, 2.0B passiv

FAE 4

I/O module for DIN rail mounting TH35 with 4 resistance range or voltage inputs e.g. for detection of temperatures and valve positions, etc. FAE 4 and FAA 4 with the same address react autonomously in a network.

- > Inputs: 4 x Analog inputs
- > Outputs: -
- > Protocol: CAN, 2.0B passiv

FRAS 4/21

I/O module for DIN rail mounting TH35 with 4 relay inputs e.g. for switching lamps, contactors, blinds, etc. FRAS 4/21 and FDE 4 with the same address react autonomously in a network.

- > Inputs: -
- > Outputs: 4 x Digital outputs

Accessories

Connection aids

**Jumper plug
for I/O components**

Jumper for time-saving and tool-free connection of various I/O components. Connects BUS and supply voltage when I/O modules are mounted side by side.

- > pluggable, 4-pole
- > Centerline: 3.5 mm
- > Material: Contacts: CuZn, housing: PA

**Terminal block
for I/O components**

Pluggable screw type terminal block for feeding the BUS and power supply of I/O components for connection cross sections of 1.5 mm² (single-wire) or 0.75 mm² (fine-wire).

- > pluggable screw type terminal block, 4-pole
- > Centerline: 3.5 mm
- > Material: Terminal body: CuZn, housing: PA

NG4

Power supply unit for DIN rail mounting TH35 with 24 V DC secondary voltage and 16 Watt power for the power supply of the METZ CONNECT I/O components for stacking via jumper plug.

- > Voltage input range: 110 - 240 V AC
- > Voltage output: 24 V DC (SELV)
- > Power: 16 Watt

**Jumper plug
for I/O components**
P/N 31135104

Switches

METZ CONNECT – your partner for building automation

As one of the leading suppliers of I/O bus modules, we and our partners have set up a cooperation structure addressing the challenges implied in modern building automation and that – thanks to its innovations – counts among the best on the market – to the advantage of our investors, planners, fitters and operators.

Through the products from our partners Echelon and Moxa, METZ CONNECT offers system components such as routers and switches that you will need to set up and to operate networks. This includes, as a matter of fact, also competent advice on how to plan, install and operate networks.

Industry Switches

Ethernet

MOXA EtherDevice Switch EDS 205

Industrial unmanaged 5 Port 10/100M auto-sensing Ethernet Switch for DIN rail mounting TH35.

- 5 Ports 10/100 Base T(X) RJ45
- Store and Forward Switching Mode
- Voltage supply: DC 12 bis 48 V

MOXA EtherDevice Switch EDS 208

Industrial unmanaged 8 Port 10/100M auto-sensing Ethernet Switch for DIN rail mounting TH35.

- 8 Ports 10/100 Base T(X) RJ45
- Store and Forward Switching Mode
- Voltage supply: DC 12 bis 48 V

MOXA EtherDevice Switch EDS 208-M-SC

Industrial unmanaged 8 port with 7x 10/100M auto-sensing and 1 x 100BaseFX Multi-mode SC-connector Ethernet Switch for DIN rail mounting TH35.

- 7 Ports 10/100 Base T(X) RJ45
- 1 Port 100 Base F(X) SC

Control cabinet components

Interface modules

In the control and automation technology, METZ CONNECT interface modules form the separation between the logic level and the load level. Interface technology means separating, forming, processing, converting and adapting signals. METZ CONNECT offers solutions for almost any application in various housing designs for the DIN rail mounting.

In addition to universally applicable coupling modules, we also offer sensor and actuator interface modules as optocouplers, potential distributors, diode modules, signalling modules, threshold switches, analogue value transmitters, analogue-digital converters and as potential isolators. The product range is supplemented by powerful and compact, pluggable 14-pole industrial relays.

Contents | Control cabinet components

1	Interface modules	35
2	Measuring and monitoring relays	45
3	Timer relays.....	49
4	Telecommunication products	53

Relays for measuring and monitoring purposes

Monitoring relays are used to protect people and machines and to control electrical cycles in line with the electrical or physical parameters and, according to the low voltage directives certain individual applications have to be equipped with these relays.

The range of products from METZ CONNECT offers a broad spectrum of measuring and monitoring relays suited for a multitude of applications: current monitors for universal applications, phase monitors as protection against destruction/deterioration of system parts, phase sequence relays to monitor the rotating field, asymmetric relays for a safe detection of phase failures, multifunctional 3-phase monitors, level relays for fill level monitoring.

Switching, controlling, visualizing – Electronic time relays

A timer relay is a special version of a relay which can be used, for example, in the field of control and automation technology to achieve switch-on or switch-off delays. The product range includes timer relays with multiple functions and adjustable time ranges as well as relays with special functions such as on-delay, off-delay, on-wiping, flashing, clocking and star-delta relays.

Interface modules

Electromechanical coupling modules

KRA-S-M6/21

Coupling module for safe potential separation. Compact design with 11.2 mm construction width. With manual operation level.

- › Operating voltage: 24 V AC/DC
- › Continuous current: 6 A
- › Contacts: 1 changeover contact (SPDT)

KRA-SR-M8/21

Coupling module for safe potential separation. Compact design with 11.2 mm construction width. With manual operation level and auto feedback.

- › Operating voltage: 24 V AC/DC
- › Continuous current: 6 A
- › Contacts: 1 changeover contact (SPDT)

KRA-M8/21-21

Coupling module for safe potential separation. Compact design with 11.2 mm construction width.

- › Operating voltage: see variants
- › Continuous current: 4 A
- › Contacts: 2 changeover contacts (DPDT)

KRA-S12/21-21-21

Coupling module for safe potential separation.

- › Operating voltage: 24 V AC/DC
- › Continuous current: 6 A
- › Contacts: 3 changeover contacts (3PDT)

Interface modules

Relay modules

RM21

Relay module for heavy loads with pluggable relay, 2-level relay socket, labeling field, retaining bracket and LED module.

- › Operating voltage: see variants
- › Continuous current: 16 A
- › Contacts: 1 changeover contact (SPDT)

RM3-1W

Relay module for heavy loads with pluggable relay, 3-level relay socket, labeling field, retaining bracket and LED module.

- › Operating voltage: see variants
- › Continuous current: 16 A
- › Contacts: 1 changeover contact (SPDT)

RM1-I 24 V DC

Inrush relay for heavy loads and high switch-on currents with pluggable relay, 2-level relay socket, labeling field, retaining bracket and LED module.

- › Operating voltage: 24 V DC
- › Continuous current: 16 A / 165 A
- › Contacts: 1 normally open contact (SPST-NO)

RM21-21

Relay module with pluggable relay, 2-level relay socket, labeling field, retaining bracket and LED module.

RM3-2W

Relay module with pluggable relay, 3-level relay socket, labeling field, retaining bracket and LED module.

- > Operating voltage: see variants
- > Continuous current: 8 A
- > Contacts: 2 changeover contacts (DPDT)

Coupling modules semi-conductor

KRE-M4/1 DC

Transistor coupler for switching DC loads.

- > Operating voltage: 24 V DC
- > Switching voltage: 4 - 48 V DC
- > Continuous current: 0,8 A

KRE-M4/1 AC

Triac coupler for switching AC loads.

- > Operating voltage: 24 V DC
- > Switching voltage: 26 - 250 V DC
- > Continuous current: 0,8 A

KMA-F8
KMA-R-F8

Analog value transmitter for manual variable adjustment with manual operation level, front side potentiometer, LED display and auto feedback.

- > Operating voltage: 24 V AC/DC
- > Input / output signal: 0 - 10 V DC
- > Function: Protected against external voltage (KMA-R-F8)

Interface modules

Analog data encoder

KMAi-F8

Analog value transmitter for manual variable adjustment with manual operation level, front side potentiometer, LED display and auto feedback.

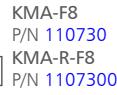

- > Operating voltage: 24 V AC/DC
- > Input / output signal: 0 - 20 mA DC
- > Function: Protected against external voltage (KMA-R-E08)

AD/DA converter

KAD-C12

Digital-analog converter for the conversion of contacts into an analog signal. With status display via LEDs.

- > Operating voltage: 24 V AC/DC
- > Sampling inputs: 0.5 V steps
- > Output voltage: 0 - 7.5 V DC

KAD-C12
P/N 110656

Interface modules

AD/DA converter

ADU-C12

Analog-to-digital converter for processing an analog input voltage into digital outputs. With status display via LEDs.

- > Operating voltage: 24 V AC/DC
- > Input voltage: 0 - 10 V DC
- > Output voltage: up to 40 V AC/DC

Pulse shaper Signal extender

RTM-C12

Time relay for extension of pulses. With adjustable pulse length of 0.15 - 3 s.

- > Operating voltage: 24 V AC/DC
- > Continuous current: 8 A
- > Contacts: 2 changeover contacts (DPDT)

RTM-C12 230 V

Time relay for extension of pulses. With adjustable pulse length of 0.15 - 3 s.

- > Operating voltage: 230 V AC
- > Continuous current: 8 A
- > Contacts: 2 changeover contacts (DPDT)

Annunciator modules

SMM-E16

Group alarm module with 10 signal inputs and relay output for quick and easy display of fault messages.

Interface modules

Annunciator modules

LTM-E16

Lamp test module for detection of single and collective messages as well as connection for lamp test for 7 lamps.

- › Voltage input: 250 V AC/DC
- › Cut-off current: 1000 V
- › Forward current: 1 A

STM-C12

Fault message module for switching on a fault signal, flashing signal and horn relay. Acknowledgeable horn output via built-in key or external signal.

- › Operating voltage: 24 V AC/DC, 230 V AC/DC
- › Continuous current: 4 A
- › Contacts: 3 relay outputs

Diode modules

KD-M8/4E

Diode module as reverse polarity protection, decoupling and arc quenching with 4 single diodes, individually switchable.

- › Input voltage: 250 V AC/DC
- › Forward current: 1 A
- › Forward voltage: 1.1 V at 1 A

KD-M8/7K

Diode module for lamp testing with 7 diodes and common cathode.

- › Input voltage: 250 V AC/DC
- › Forward current: 1 A
- › Forward voltage: 1.1 V at 1 A

Interface modules

Industrial relays

Socket 14 poles

14-pole relay socket for industrial relays MC274 with integrated quick-release fastener for DIN rail and terminal designation EN 50022.

- > Relay socket: 3 floors
- > Nominal current: 10 A
- > Nominal voltage: 300 V AC

Socket 14 poles for electronic modules

14-pole relay socket for industrial relays MC274 with integrated quick-release fastener for DIN rail and terminal designation EN 50022. With connection possibility for LED or RC modules.

- > Relay socket: 2 floors
- > Nominal current: 10 A
- > Nominal voltage: 300 V AC

Socket with spring-clamp terminals

14-pole relay socket with spring terminals for industrial relays MC274 with integrated quick-release fastener for DIN rail and terminal designation EN 50022.

- > Relay socket: 3 floors
- > Nominal current: 10 A
- > Nominal voltage: 300 V AC

Accessories

Connecting bridge, 10 pole

Jumper for quick and easy connection of the terminals A1 and / or A2 of the coupling modules of the F8 and F10 series.

- > Rated voltage: 24 V AC/DC
- > Rated current: 2 A
- > Pole size: 10

Interface modules

Accessories

End mount for connecting bridge

Closure piece for placing on the ends of the jumper.

RC module for industrial sockets

RC module for 230 V AC or 24 V AC for interference suppression for relay modules and 14-pole industrial socket.

Connecting bridge for industrial sockets

5-pole jumper for quick and easy connection of the terminals of the 14-pole industrial sockets.

Holding bracket wire

Metal retaining bracket to secure the MC274 industrial relays in the relay socket.

- › Rated voltage: 250 V
- › Rated current: 10 A
- › Pole size: 5

Measuring and monitoring relays

Fan timer

LTRk-E12

Fan timer relay for control of 2-stage motors. Pick-up and switch-off delay are separately and continuously adjustable.

- > Continuous Current: 6A AC1 / 1.5 A AC3
- > Start-up delay: adjustable time of up to 30 s
- > Switch-off delay: adjustable time of up to 60 s

Speed monitoring

DRIW-E16

Speed and V-belt monitor for monitoring rotational movements (underspeeds) on motor- or belt-driven shafts.

- > Max. monitoring range: 4200 pulses/min
- > Switch-off range: 120 pulses/min
- > Start-up bridging: 60 s

Two-wire sensor

Two-wire sensor for speed and V-belt monitors with cylindrical, nickel-plated metal body with M18 thread and 2 flat nuts.

Mounting bracket HWR

Retaining bracket for fixation of sensors with max. 18 mm diameter incl. auxiliary cam for shafts up to 45 mm diameter.

LTRk-E12
 24 V AC P/N 11028313
 230 V AC P/N 1102830530

P/N 110146

Measuring and monitoring relays

Speed monitoring

Mounting bracket HWF

Retaining bracket for fixation of sensors with max. 18 mm diameter on flat bars.

cosPhi monitoring

CPW-E12

CosPhi monitor for detecting an underload with adjustable response value (cosPhi 0-0.97) and adjustable response time (1-100 s).

- > Operating voltage: 230 V AC
- > Frequency range: 2- 200 Hz
- > Input current: min. 0.2 A / max. 10 A

Motor protection monitoring

TMR-E12 without error memory

Thermistor relays as protection against thermal overload for motors. With thermistor connection (PTC).

TMR-E12 with error memory

Thermistor relays as protection against thermal overload for motors. With thermistor connection (PTC) and integrated fault memory (FS).

- > Operating voltage: 230 V AC or 24 V AC/DC
- > On / Off resistance: 1.8/3.0 kOhm
- > Contacts: 1 (SPDT) or 2 (DPST) changeover contacts

- > Operating voltage: 230 V AC or 24 V AC/DC

Measuring and monitoring relays

Level monitoring

ENW-E12

Level controller for level and leakage monitoring of conductive and non-flammable media. Adjustable response point via potentiometer.

- Operating voltage: 230 V AC or 24 V AC/DC
- Response sensitivity: 5 - 50 kOhm, adjustable
- Contacts: 2 changeover contacts (DPDT)

Submersible Electrode TE2

Single-pole dipped electrode made of stainless steel for the detection of electrically conductive liquids, e.g. in water supply and pumping stations. For connection to the level-monitors ENW-E12 and MR-LD6.

- Material electrode: Stainless steel
- Housing: Polypropylene
- Length: 115 mm

Leakage sensor LKS-ZD

LKS-ZD for leak monitors MR-LD6 and ENW-E12. In case of leakages such as pipe breaks, electrically conductive liquids are detected by the electrodes.

- Material: Stainless steel
- Housing: Polycarbonate with mounting opening
- Application: ENW-E12, MR-LD6 (with wire break monitoring)

ASD-C18
ASD-F-C18

Monitoring relays for monitoring of a three-phase connection to asymmetry, phase failure, phase sequence error, over- and undervoltage.

- Operating voltage: 230 V AC
- Monitoring voltage: 3 x 230/400 V AC, 50 Hz
- Contacts: 2 changeover contacts (DPDT)

ENW-E12
230 V AC P/N 11030805

Measuring and monitoring relays

Phase monitoring

PFD2-E12

Monitoring relay for monitoring the correct phase sequence L1-L2-L3 (clockwise rotation) and total failure.

PFD3-E12

Monitoring relay for monitoring the correct phase sequence L1-L2-L3 (clockwise rotation) and total failure with neutral wire connection.

- Supply and measuring voltage: L1-L2-L3 | 400 V
- Continuous Current: 6 A
- Contacts: 2 changeover contacts (DPDT)

- Supply and measuring voltage: L1-L2-L3-N | 400 V
- Continuous Current: 6 A
- Contacts: 2 changeover contacts (DPDT)

Undervoltage monitoring

DUW-C12
DUW-F-C12

Undervoltage monitoring relay in three-phase networks for emergency light systems according to DIN VDE 0108 with fixed threshold value and integrated test button.

EIW-C18
EIW-F-C18

Current monitoring relay of direct or alternating currents with indication of over- or undercurrent. With 7-segment display and error memory.

- Operating voltage: 3N 400/230 V, 50 Hz
- Threshold value: 195 V AC, fixed
- Contacts: 2 changeover contacts (DPDT)

- Operating voltage: 230 V AC
- Measuring inputs: 0.01 A - 1 A / 0.1 A - 15 A
- Contacts: 2 changeover contacts (DPDT)

Measuring and monitoring relays

Current/Voltage monitoring

Current converter

EUW-C18
EUW-F-C18

Voltage monitoring relay of DC or AC voltages with indication of over- or undervoltage. With 7-segment display and error memory.

- > Operating voltage: 230 V AC
- > Measuring inputs:
1 V - 100 V / 10 V - 300 V
- > Contacts: 2 changeover contacts (DPDT)

TAmini 50 A / 5 A

Current transformer TAmini for mounting on a 35 mm DIN rail, 21 mm hole diameter for cable and rail 20 x 5 mm.

- > Transformer ratio: 50 A / 5 A
- > Nominal frequency: 50 Hz
- > Operating frequency: 47 - 63 Hz

TAmini 100 A / 5 A

Current transformer TAmini for mounting on a 35 mm DIN rail, 21 mm hole diameter for cable and rail 20 x 5 mm.

- > Transformer ratio: 100 A / 5 A
- > Nominal frequency: 50 Hz
- > Operating frequency: 47 - 63 Hz

Timer relays

Delay on make

RTLk-E10

Switch-on delayed time relay with time adjustment via a linear potentiometer.

Switch-off delay

RKAk-E10

Switch-off delayed time relay with time adjustment via a linear potentiometer.

Circuit closing, wiping

EWEk-E10

Wiping on time relay with time adjustment via a linear potentiometer. With adjustable wiping time.

REWk-E10

Switch-on wiping time relay with factory-set wiping time of 0.5 s.

Telecommunication products

Power switching relay

SAR 4 / SAR 5

High voltage current connection relay for connection to an a/b TC connection cable or to a separate control voltage source for an external signal generator.

- > Continuous voltage: 24 V AC/DC or 230 V AC
- > Call voltage: a/b telecommunications access line 32-80 V AC
- > Continuous current relay output: 6 A

SAR 1

Power connection relay in surface mount housing for connection to an a/b TC connection cable for an external a signal generator with built-in switch.

- > Call voltage: a/b telecommunications access line 32-80 V AC
- > Continuous current relay output: 6 A

SAR 4 230 V AC
